COUNTRY	East Germany	REPORT	
SUBJECT	Infrared Research at Zeiss Jena	DATE DISTR.	28 September 1954
DATE OF INFO.		NO. OF PAGES	1
PLACE ACQUIRED		REQUIREMENT NO.	RD
		REFERENCES	

This is UNEVALUATED

THE SOURCE EVALUATIONS IN THIS REPORT ARE DEFINITIVE.
 THE APPRAISAL OF CONTENT IS TENTATIVE.
 (FOR KEY SEE REVERSE)

1. VEB Carl Zeiss, Jena, has 12 chambers for infrared drying, of which, however, only four are in operation. The chambers have an approximate size of 1.5 by 2.5 by 2.0 meters. They are provided with an installation for the lacquering of instruments and instrument parts and with a circular conveyor installation moving at slow speed in "paternoster" fashion. The lacquered parts suspended on the conveyor are subjected to infrared drying which usually takes ten minutes.
2. Infrared research is under the direction of Puls (fnu)¹, a returnee from the USSR. He is head of one of the nine EBoG offices (Entwicklungsbuero fuer Geraete-office for development of devices).
1. Comment: Possibly identical with Arthur Pulz, a Zeiss specialist deported to the Soviet Union in 1946 and repatriated in 1952.
